

Delivering a Load without Damages

Modified on: Tue, 18 Dec, 2018 at 2:27 PM

After you have loaded and submitted a load via the app it will be available in the **Deliveries** tab.

1. Click the **Deliveries** tab (iPhone) or select **Deliveries** from the side menu (Android).

2. Click on a load to bring up options for this load.

3. Choose an option.

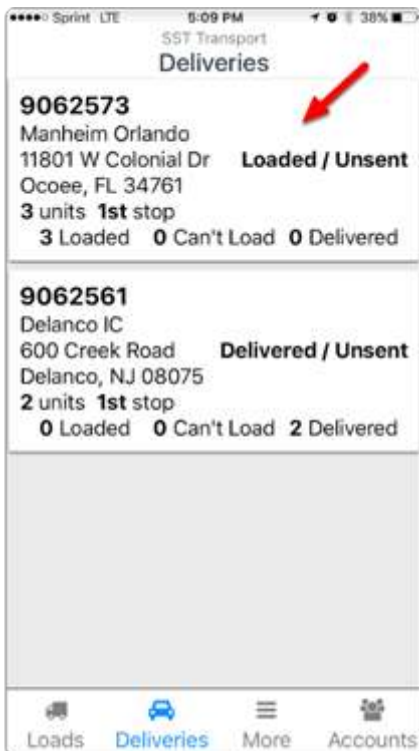

Navigate To...: Choose this option for directions to the delivery location. This will open your device's map application.

Phone Number: Choose this option to call the delivery location.

Show Notes: Choose this option to show any notes for the delivery location.

Cancel: Choose this option to close this window and go back to the load details.

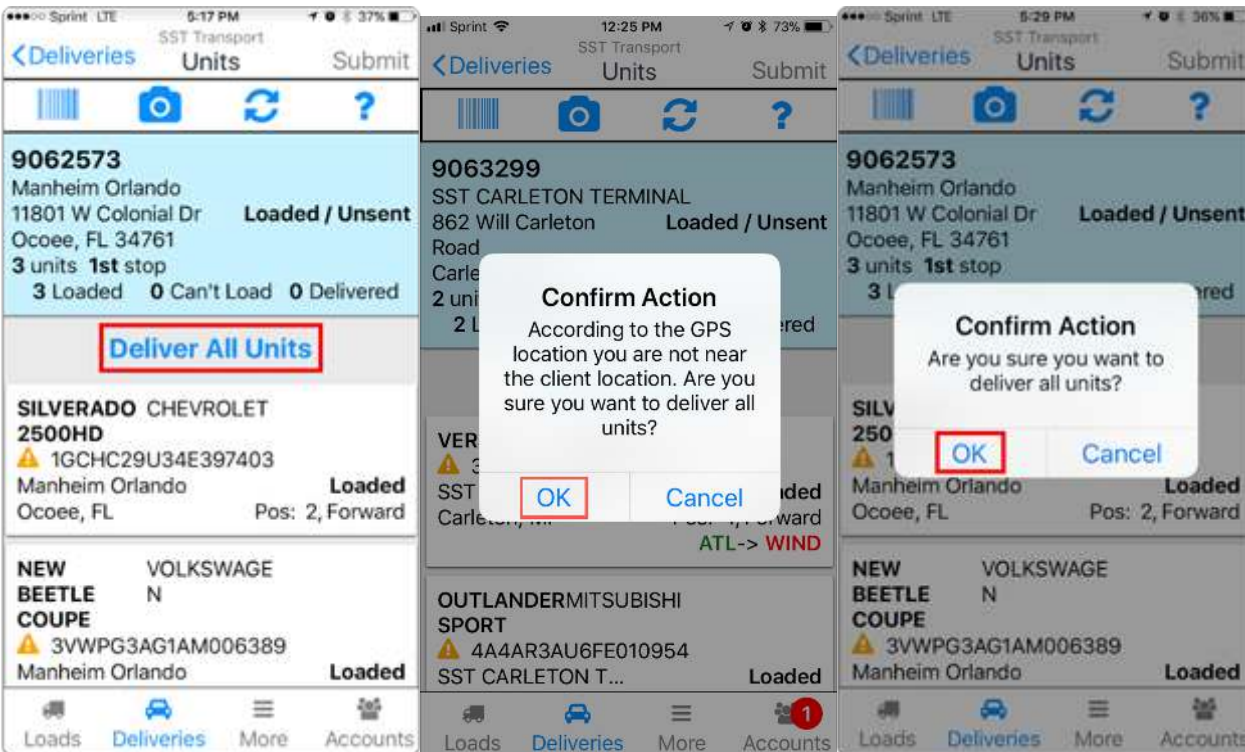

Deliver: Choose this option to start the delivery process.

Deliver

1. If none of the vehicles being delivered have damage then you can simply click **Deliver All Units**.
2. If you are not currently at or near the delivery location you will be alerted and asked to confirm that you want to deliver the unit(s) for this client. Click **OK** to confirm.
3. If you are at or near the delivery location then you will only be asked to confirm you want to deliver all units. Click **OK** to confirm.
4. All vehicles will now be marked **Delivered**. And the Load status will be marked as **Delivered/Unsent**.

Next, you will need to submit the delivered load via the app. See [Submitting a Delivered Load](https://vtvsolutions.freshdesk.com/support/solutions/articles/17000056178-submitting-a-delivered-load) (<https://vtvsolutions.freshdesk.com/support/solutions/articles/17000056178-submitting-a-delivered-load>).
